

Subject-Affiliation of documents in New CEEOL

Dear Editors and Publishers,

Users coming to CEEOL can be considered as

- people who exactly know what they are looking for (*knowing an author's name or the title of an article or an eBook they are looking for*), or
- people who have a special topic or question in mind on which they are searching for additional texts and research works.

The second group of users will always browse the entire library using the pre-defined SUBJECT-AREAS as filters for browsing the entire library.

Subject-affiliation of the articles, made during the cataloguing and uploading of a journal issue, is therefore a crucial criterion → for the users, to find what they are looking for
→ for the authors and editors, to make their content findable by a significantly larger number of readers

While in the old CEEOL we had less than 20 subject areas in a very general form – “Philosophy”, “History” etc. – the New CEEOL offers

- **a much more sophisticated, three-steps subject-affiliation**
- **and the possibility to affiliate each document to more than only 1 subject**

Colleagues in the editorial offices and/or publishing houses are kindly requested to make themselves familiar with the new system and list of subjects offered in New CEEOL, before they start indexing new content.

To facilitate correct subject affiliation in future, this PDF file can be communicated to the authors to allow them to decide, with which subjects their texts should be affiliated best and most accurately.

Requests for the addition of new subject areas to the current list can always be sent to Publisher.Support@ceeol.com

Please find on the following pages the full list of subject-areas and their break-down to a refinement in partly 3 levels.

Thank you very much,

Your CEEOL-Team.

General Subjects

Refinement Level 1

Refinement level 2

General Reference Works	
	Bibliography
	Review
Economy	
	National Economy
	Supranational / Global Economy
	Business Economy / Management
	Micro-Economics
